## NOTES TO FINANCIAL STATEMENTS

---

### 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation - The financial statements have been prepared in accordance with accounting practices prescribed or permitted by the Michigan Office of Financial and Insurance Services (OFIS) and the National Association of Insurance Commissioners (the NAIC). These practices differ in some respects from generally accepted accounting principles (GAAP). Certain assets are considered non-admitted for statutory purposes and are excluded from the balance sheet. These non-admitted assets have been allocated to retained earnings (deficit) in the financial statements.

Cash and Cash Equivalents -Cash and cash equivalents include operating cash and short-term investments with original maturities of one year or less at the time of purchase. These amounts are reported at cost, which approximates fair value.

Health Care Costs -Health care costs include claims paid, claims in process and pending and estimated unreported claims and charges by physicians, hospitals and other health care providers for services rendered to members during the year. Adjustments to prior period estimates are reported in the current period, and changes in these estimates may be significant. Given the nature of these expenses, amounts accrued at year-end are paid predominantly in the following year.

Claims payable are determined using statistical analyses and represent estimates of the ultimate net cost of all reported and unreported claims that are unpaid at the end of each accounting period. Although it is not possible to measure the degree of variability inherent in such estimates, management believes the liabilities for claims are adequate.

Premiums -Premiums are billed monthly for coverage for the following month and are recognized as revenue in the month for which insurance protection is provided. Premiums collected in advance of services rendered are reflected as unearned premiums.

Use of Estimates -The preparation of financial statements in conformity with accounting practices prescribed and permitted by OFIS requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from these estimates.
